

OBJECTIVES

We want to promote earth & bamboo as excellent materials for sustainable construction and establish a global network to enforce exchange of knowledge and experience.

Earthen and bamboo architecture has not only a long tradition in human settlement, but it also offers many advantages for contemporary architecture. BASEhabitat wants to foster the consideration of socio-cultural, economical and ecological aspects in the architectural design and construction.

PROGRAM

Practice and theory on contemporary architecture with low-tech materials: earth and bamboo.

Workshops

The focus lies on practical work. Participants can choose 2 workshops on different techniques. Each one lasts 4,5 days.
