Nina Pawlicki

Previously with the Habitat Unit and since 2017 at the Natural Building Lab, Nina has been a teaching and research associate at the Technische Universität Berlin since 2013. She became part of the CoCoon-Studio in 2011 and is planning to hand in her doctoral thesis on the impact and agency DesignBuild in 2019.

Nina studied architecture at the Technische Universität Berlin and the Pontificia Universidad Católica de Chile.

“Resource scarcity, climate change, environmental pollution and resulting mass migration and conflicts are current global challenges that are forcing us to radically rethink the way we live and work.”

Global urbanization and building processes are one of the biggest greenhouse gas producers that we urgently need to transform into sustainable and socially inclusive systems.”

Within her work she is facilitating intercultural, hands-on and community-based projects on the interface between academia and non-academia. Through transdisciplinary approaches she is seeking to investigate how community engagement processes can lead to the design of more inclusive and diverse living environments. The main objective is to develop contextual, sustainable and locally appropriate strategies and built solutions.

As an architect, researcher and teacher she was involved in building projects in Mexico, Jordan, Mongolia, Germany and Colombia in her role as a project initiator, coordinator or director. She also has a wide range of experiences from her time working as a freelance architect for various architecture offices.
