BASEhabitat International Summer School

on building with earth and plant fibres

July 06-20, 2025
Kuchl/Austria

Objectives

Promote earth and plant fibres as excellent materials for contemporary architecture and establish a global network to enforce exchange of knowledge and experience.

Workshops

Learn from world-leading experts how to build with regenerative materials. Participants can choose two workshops on different techniques, each lasting 4.5 days. There is also time for exchange between the workshops.

ADOBE + EARTH BLOCKS | AMÀCO - FRANCO NORIEGA + MARGOT LACOMBE
RAMMED EARTH | DOMINIK ABBREDERIS + MAX WEIDACHER
EARTH + FIBRES | BECKY LITTLE + FRANCOIS STREIFF
STRAW + REED | ANGELO FERRARA + CHRISTIAN DITLEFSEN

Material Science

The Summer School starts with a series of inputs and tests to understand earth and fibres as building materials and their potential in architecture.

Theory Classes

Throughout the Summer School, different lectures will provide insights and allow for discussion on the challenges of sustainable architecture. Our guests will be pioneers like Anna Heringer, Martin Rauch and others.

Networking

In the evening, we give the stage to the participants. They can present their projects or research work, discuss them with the others and create new networks.

Who can participate?

We address architects, students, lecturers, craftspeople and engineers from all over the world, who are interested in sustainable architecture.

FACTS

Date and Location

July 06 - 20, 2025

Wissenscampus Kuchl,
Markt 136
5431 Kuchl, Austria

Participation Fee

€2190.-
