socially responsible architecture with regenerative materials in international contexts

## Enjoy

a special learning environment in a group of international participants and teachers.

## Become a Builder of Change! Join us 2024

## Manage

socially responsible planning and building processes.

## Design

in close co-operation with the client and benefit from a practice driven approach.

## Develop

sustainable solutions for the built environment at different scales, from buildings to regions.

## Understand

different places and contexts and their dynamics.

## Explore

circularity in architecture and get inspired by lighthouse projects.

## Gain experience

hands-on - with regenerative materials and learn about their potentials for future architecture.

## Create

global networks with experts from different disciplines.

## Be part of

a unique study programme at the University of Arts Linz, Austria.
