Master of Advanced Studies - Architecture

University of Art and Design Linz

Photo: BASEhabitat

I strongly believe architecture is a tool to improve lives. As architects we do have power to influence the society and to make a change. Rather than exploiting our planet's precious resources, we can be sensitive and graft what we find locally.

Anna Heringer

Postgraduate | **BASEhabitat** architecture of change

Aware of the global challenges we face, ranging from environmental destruction and dwindling resources to prolonged poverty and growing inequality, the need to prepare future architects and professionals to deal with current problems in the field requires new methods and tools, including a repertoire of skills.

Responding to this urgent need, the Postgraduate | BASEhabitat is aimed at students and professionals who are looking for an educational context in which to learn and enhance their skills and abilities by expanding their range of action to address social and environmental issues. The program, combining theoretical knowledge and practical experience, explores the practice of architecture in a different way, involving diverse actors within the design process, understanding the implications of design decisions by focusing on in-depth choices of materials and construction methods.

It is taught by an international body of visiting renowned designers and scholars as well as teaching staff from BASEhabitat. The approach is focused on hands-on experience, in a context of professionals from various disciplines and an international learning environment.

As today's construction activities are extremely resource-intensive and harmful to the environment and our climate, special attention is given to natural building materials that have been at the hearth of BASEhabitat for the past 15 years. The program is a one-and-a-half-year, English-language course that consists of three terms of full-time study after which students receive a Master of Advanced Studies in Architecture – BASEhabitat (MAS) from the University of Art and Design Linz.

Postgraduate | BASEhabitat

General information

Start date

February 1, 2022

Duration

3 terms (full time)

- THEORY AND DESIGN: February 2022 - July 2022
- HANDS-ON EXPERIENCE: September 2022 - December 2022
- MASTER'S THESIS: February 2023 - July 2023
(end of September 2023: thesis defense)

Academic accreditation

Master of Advanced Studies (MAS) Architecture

Credits

90 ECTS

Language

English (level B2)

Tuition Fee

9.500€

Participants

max. 20

Application information

Admission

Application period from July 19, 2021 to September 15, 2021

Application

Submit your application until September 15, 2021

Admission Interviews September 28-30, 2021

Required Qualification

Graduate Degree or University BA + MA Degree
in architecture or a comparable branch

Look at Application section on our website on how to submit
the required documents.

BASEhabitat international, sustainable, collaborative

BASEhabitat is a studio in the department of architecture at the University of Art and Design Linz. We have been working in the field of social and sustainable architecture and spatial development for more than 15 years now. Our focus is on local and natural construction materials. We collaborate with community partners from around the world.

BASEhabitat offers a wide study program, hands-on learning opportunities and real-scale projects.

BASEhabitat works in planning and realizing projects, as well as in research on an academic level. Outside of academia, BASEhabitat develops exhibitions, offers workshops, on-site practice and hosts a bi-annual International Summer School.

International Experience

BASEhabitat works in research, planning and implementing architectural projects. The worldwide positive feedback and reputation and multiple international awards, like the World Energy Globe, are rewards for our dedication and work. Our projects have taken us to countries around the world, such as Ecuador, India and South Africa.

Global Network

BASEhabitat is a member of the UNESCO Chair Earthen Architecture, Building Cultures and Sustainable Development and maintains excellent relations with international schools and research facilities. Our work and projects have put us in touch with a large number of architects, designers, craftsmen and experts from around the world.

Summer School

The BASEhabitat Summer School is a biennial set of workshops, where like-minded professionals from more than 40 countries come together to learn from and work with renowned experts in earthen architecture and bamboo construction.

Curriculum structure

Postgraduate | BASEhabitat

The program consists of a year-and-a-half full-time study divided over three terms for a total 90 ECTS to obtain the degree. Study begins once a year in February and concludes a year later in July. The incoming 2022 cohort will start on 1 February, 2022 with the introduction week, and the participants will graduate at the end of September 2023.

1 THEORY AND DESIGN

40 ECTS

February – July 2022

6 months - at University of Art and Design Linz, Austria
Project-based design studio with a unique focus every year, anchored by theoretical lectures, seminars, practical workshops and master class.

2 HANDS-ON EXPERIENCE

20 ECTS

mid-September – mid-December 2022

3 months - on a BASEhabitat construction site
Construction phase combined with design aspects and reflections - under the guidance of the BASEhabitat construction manager.

3 MASTER'S THESIS

30 ECTS

February – July 2023

6 months - not bound to a certain location
Thesis development that includes theoretical work, architectural design and portfolio - supervised by a guest professor.

 BASEhabitat team
 and other renowned
 lecturers

Timeframe
 Start: Feb 01, 2022
 End: July 31, 2022

optional
 BASEhabitat
 Summer School
 July 22 - Aug 02, 2022

- During the first term, students will be introduced to several topics and methods from different disciplines, with a focus on the **three aspects of sustainability** (social, environmental and economic) in order to establish a set of common design tools.
- The term is organized around a project-based design studio with a unique focus every year, anchored by theoretical lectures, seminars and practical workshops.
- Students will discover natural building materials and examine various techniques in order to understand how to design with them. Furthermore, students will analyse vernacular and contemporary projects and visit some example architectural projects in Austria. Participatory methods and decision-making processes will be explored as a tool to engage with different stakeholders. Students will get practical skills to start their own community-based projects after completing their studies.
- In conjunction with the courses, a theory seminar linked to the design studio fosters an atmosphere of intellectual exchange that challenges the discipline of traditionally conceived architecture.
- Each year BASEhabitat organizes a one-week practical master class led by Martin Rauch. In addition, students will begin to define the topic of their thesis project to be completed in the third term of study.

1 TERM: Theory and Design [40 ECTS]

Feb. 2022	Jul. 2022
DESIGN STUDIO Project-based studio [10 ECTS]	
THEORY SEMINAR Lecture series [5 ECTS]	
SUSTAINABILITY: Environmental aspect Natural building materials [7 ECTS]	
SUSTAINABILITY: Social aspect Participatory methods [4 ECTS]	
SUSTAINABILITY: Economic aspect Social entrepreneurship [4 ECTS]	
THESIS SEMINAR Preparation Master Thesis [2 ECTS]	
SPECIALIZATION Consultation with experts [3 ECTS]	
PRACTICAL MASTER CLASS Martin Rauch [5 ECTS]

2 Hands-on Experience
on a BASEhabitat construction site

Team:
BASEhabitat construction
manager

Timeframe
mid-September 2022
to mid-December 2022

- The second term takes students to a BASEhabitat construction site, which can be located anywhere in the world. The project in which the students will be involved is not linked to the design studio of the first term.
- Students will experience the local context of the project, understand the climatic conditions, available building materials and construction techniques, and visit some architectural examples of the area.
- Students will plan the construction phase, optimizing the architectural solutions and developing the technical details of the project.
- Working as a team, they will be actively involved in the construction phase, under the guidance of the BASEhabitat construction manager. Students will learn how to build with natural building materials on a real construction site by gaining hands-on skills.
- The practical work will be followed by an extensive report documenting the construction process, including critical reflections.

2 TERM: Hands-on experience [20 ECTS]

mid-Sept.
2022

mid-Dec.
2022

HANDS-ON PRACTICE

Project not linked to the Design Studio [10 ECTS]

PLANNING HANDS-ON PRACTICE

Preparation [5 ECTS]

REFLECTIONS HANDS-ON PRACTICE

Documentation [5 ECTS]

Photos: BASEhabitat

3 Master Thesis

not bound to a particular location

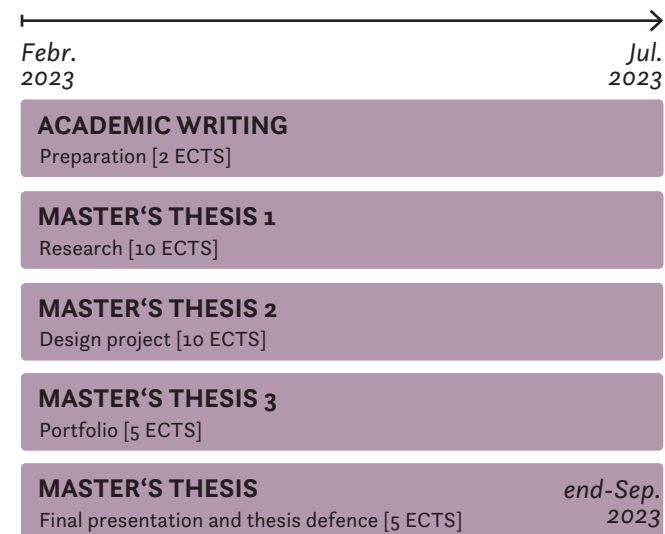

Team:
guest professors
BASEhabitat team

Timeframe:
February 2023
to July 2023

Thesis defence at the end
of September 2023

- During this final term of study, students will develop a master's thesis that includes theoretical work and an architectural design, demonstrating their ability to critically synthesize the knowledge acquired during previous terms and apply it in a personal project.
- The master's thesis is an individual work of the student under the guidance of a professor. It also contains the portfolio which includes the projects developed during the first and second term.
- Students will write their thesis in a place of their choice and supervision will take place via online communication.
- The final exam consists of a presentation of the thesis to an audience in Linz or in an online format in September 2023.

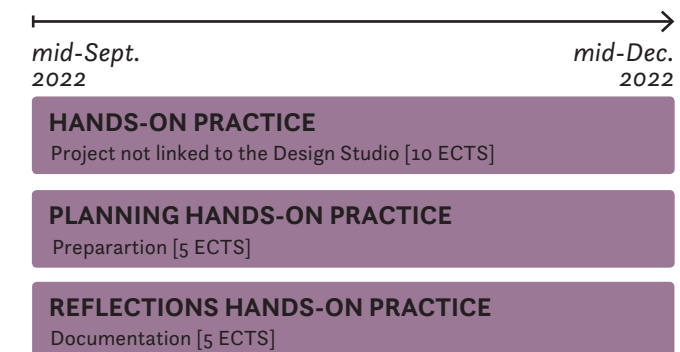

3 TERM: Master Thesis [30 ECTS]

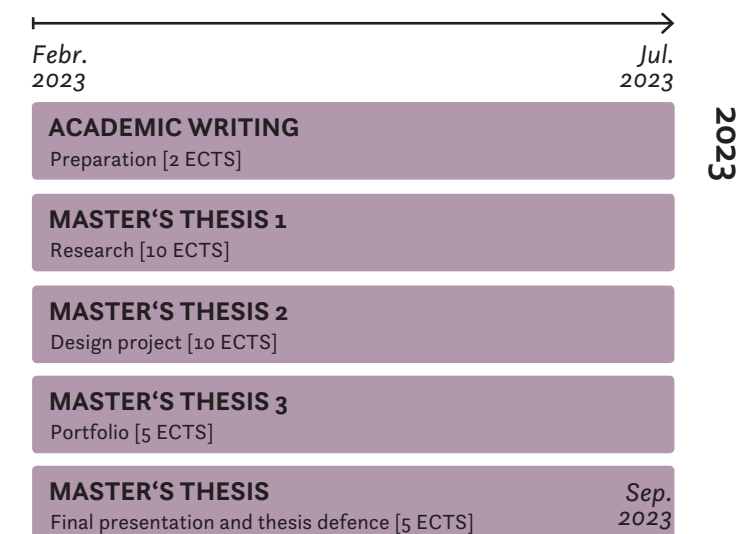

1 TERM: Theory and Design [40 ECTS]

2 TERM: Hands-on experience [20 ECTS]

3 TERM: Master Thesis [30 ECTS]

2022–2023 Application

The application process for the BASEhabitat Post-graduate Degree consists of the following steps:

- Submit your application documents. Applicants should send their application to **basehabitat.postgrad@ufg.at** by September 15, 2021. Please see the Application Documents section on our website on how to submit your application.
- Evaluation of your application. Your application will be evaluated by at least two members of BASEhabitat. Applications will only be evaluated once during an academic year.
- After reviewing your application, selected applicants will receive an interview invitation by email from BASEhabitat. Interviews are by invitation only and conducted by a member of BASEhabitat, who will have thoroughly read your entire application package. The invitation will be sent by email. Interviews are conducted via Zoom or, when logistically possible, held in person in Linz. Following the interview, students will either be accepted or rejected to the program.
- Applicants will be informed about their application status within a week of their interview.
- After being admitted to the Postgraduate | BASEhabitat, applicants will receive an admission letter and a payment letter which helps you to arrange funding through a scholarship or study loan. On the letter there are payment details and a request to submit a non-refundable deposit fee of 20% to confirm your participation.
- The full tuition fee payment must be made before the payment deadline of November 1, 2021. Please note that these payments are part of the admissions process. BASEhabitat will finalize your enrolment to the program after full payment is received on our account before the payment deadline.
- The course fee does not include travel, accommodation, or study material costs either in Linz or on the construction site.

Study at the University of Art and Design Linz

There are many reasons to study architecture at the University of Art and Design Linz:

- The small number of students makes for a familiar atmosphere in the studios and workshops and ensures close interaction with supervisors and professors.
- The light-flooded studios and the location in the heart of the city are a great source of inspiration.
- Linz, with its young and vibrant art scene (Ars Electronica), is a great place to study.
- Linz is located in the centre of Europe: 185 km from Vienna, 243 km from Prague and 574 km from Venice.

Those factors create an encouraging environment for you to thrive both in teams with fellow students and individually.
